

Experience, Products, and Agricultural Know-How to Keep Your Operation Profitable

Rain for Rent is the leading provider of irrigation parts, service, and liquid handling solutions. Rain for Rent insists on offering respected, high-quality equipment and parts from brands you trust. From pumps and filtration to pipe, hose, pivots, and other irrigation products, we provide everything you need to keep your operation on track. Growers and producers trust Rain for Rent to deliver efficient irrigation solutions, thoroughly and cost effectively.

● Irrigation Systems

Whether your system calls for center pivot, lateral, wheel line, drip/emitter, fixed nozzle or something else, Rain for Rent has you covered. Replacement sprinkler packages are also available.

● Pumps

Rain for Rent offers centrifugal, submersible and turbine pumps for sale and rental, with diesel or electric drive options. Whether you're irrigating your crops, dewatering your lagoons, or anything requiring a pump we can easily evaluate your system needs and recommend the best pump.

● Filtration

To help keep your irrigation system operating efficiently, Rain for Rent filtration products remove sediment from clogging your water sources to prevent clogging or algae buildup.

● Pipe and Fittings

Aluminum pipe is available in mainline, lateral, and vacuum. Our pipe is available in band and latch, dragline, gated, heave end, latch or no-latch, plan end and ringlock. Certa-Set main line and laterals also available.

Engineered Irrigation Design

Rain for Rent is a leader providing design and engineering for hydraulically sound water-saving irrigation methods. Our engineers are certified and have a long history of learning and applying the latest irrigation methods and the most effective equipment. The designs allow your crops to yield better and grow faster while saving you money in the process.

Irrigation Systems

Sprinkler Irrigation

Rain for Rent is a leader in sprinkler irrigation rentals and sales. We offer every part of a sprinkling system from gasket to pipe and sprinkler ends.

Drip and Micro Sprayers

Micro Sprinkler Irrigation systems provide highly uniform and targeted distributions of water, allowing for maximum production.

Wheel Moves

Wheel Move irrigation features an engine-driven, high pressure all-hydraulic power train.

Pivots

Rain for Rent provides Reinke Pivots, with a five year warranty – the best in the industry.
