

Rain for Rent is your Eco-Friendly Partner

Rain for Rent uses several innovative, **eco-friendly products** - both on the jobsite and in the office - making us a great partner for your organization and the environment.

- 1 Spill Containment**
On the jobsite, we offer a variety of spill containment products to reduce environmental impact in the event of a leak or spill.
- 2 Vegetable Oils as a Seal Lubricant**
Our submersible pumps use environmentally friendly vegetable oils as a seal lubricant and a hydraulic pump fluid.
- 3 Carboline Tank Lining**
We use an advanced Carboline tank lining that is a completely solid material, producing no VOC's.
- 4 EnviroTank**
Our EnviroTank line is certified for use with potable water.
- 5 Filtration Equipment**
Our filtration equipment allows different industries to clean and reuse water, which eliminates the need for additional water pumping or trucks.
- 6 Telogis GPS System**
Our Telogis GPS system monitors and reduces our trucks idle times on job sites, eliminating pollutants caused by idling vehicles.

Our procurement group sources a variety of eco-friendly and recycled office products, from recycled paper to low plastic pens and recycled/remanufactured toners. We implement measures to recycle our aluminum and HDPE products that have reached the end of their lifecycles and repurpose them.
