

## Overview:

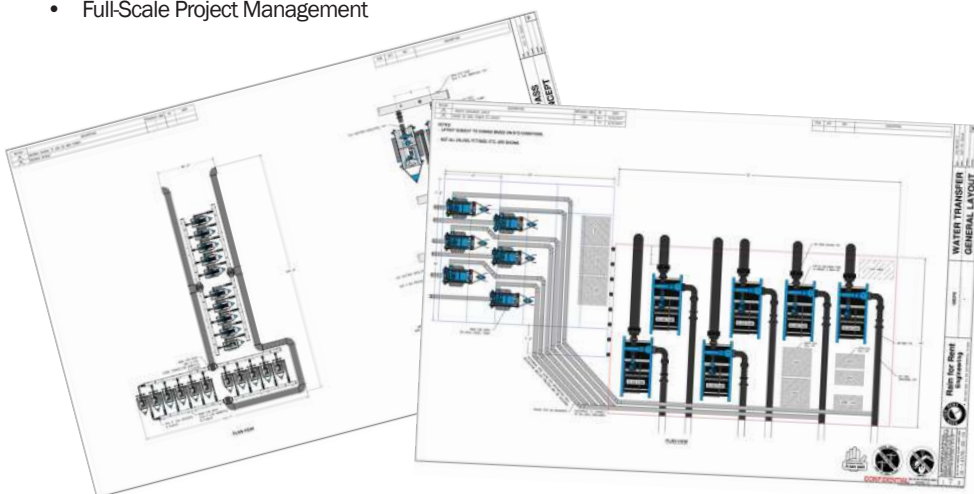

Rain for Rent's fully-staffed Engineering Department has provided unique solutions to our customer's liquid handling and storage needs for over 40 years.

From supporting the rental fleet and sales team to maintaining all technical information and designs company-wide, there's no project too large, nor system too complex for us to provide an engineered solution.

Whether facilitating communication between sales and operational teams, providing detailed system designs, or even full scale project management, we have your back.

## Services:

- Project Design
- Equipment Design & Evaluation
- Chemical Compatibility & Safety Consulting
- Project Controls
- Instrumentation & Automation
- Full-Scale Project Management

**PUMPS • TANKS • FILTRATION • PIPE • SPILLGUARDS**

## HOW WE CAN HELP

Rain for Rent's engineers design specific solutions for your clients' individual needs. Consistent, professional review of engineering data, flow requirements, friction loss, NPSH requirements and operating conditions ensure a safe and trouble-free system.

Your application will be designed by our engineering staff to assure suitable performance.

**Liquid Ingenuity®**
