Particulate Filter

PFBF1000

Overview:

The PFBF1000 filtration unit provides a uniquely customizable filter opportunity. It can be configured either as one of two cartridge filtration units or as a bag filter unit. The Cartridge filter configurations holds either eighty-six 2.5” cartridges, or if using plate configuration it holds eight 7” pleated cartridges. Bag filter configuration of the PFBF1000 holds eight 7” x 30” filter bags. No matter the configuration, you have the opportunity to filter down to 100 and 0.5 microns with flows up to 1000 GPM.

Features:

One filter tank configurable in three methods:

- 2.5” cartridges
- 7” pleated cartridges
