

# Get Off the Tank.

Throw Away the Measuring Stick.

Be Proactive with Your Data.

## Improve Safety

No more climbing on tanks to check levels.  
Prevent spills with real-time monitoring.

## Dial in Accuracy

Dynamically calculates volumes  
eliminating the need for strapping charts.

RiteFlo® Wireless Gauge

## Increase Efficiency

Use manpower on your jobsite to do work,  
not check tank levels.

## Reduce Downtime

Set up alerts when water levels  
are out of compliance.

Rain for Rent's RiteFlo Wireless Gauge makes it easy to monitor liquid levels, flow, temperature, pressure, and relay monitoring from anywhere. Cloud reporting can be managed via cell, radio or WiFi signal.
