

Spillguard

High Wall

Part of the WORKSAFE™ family of products

Overview:

WORKSAFE™ High Wall Spillguards provide the 110 percent containment required by many government associations. The High Wall Spillguard is a patented, heat-welded berm with reinforced seams and support legs that are removed for setup and take down.

Features:

- Wrap around corners to prevent leaks
- Chemically resistant containment fabric
- External Aluminum Bracing
- Designed to be deployed on uneven terrain through the use of individual A-frames that adapt to the contour of the ground
- Available in acid and standard tan models
