

# SprayGuard

## Fin Fan Cleaning Sprayguard

### Overview:

The Fin Fan Sprayguard is spray containment unit designed to protect workers and jobsites from overspray and contamination during internal Fin Fan cleaning projects. It is deployed for Fin Fan cleaning in Petrochemical, Petroleum, Process industry applications - as well as the production of Steel, Cement and Sugars.

### Features:

- Open Top - No confined space permitting required
- Easily assembled
- Minimize waste by capturing effluent
- Reduces post hydroblast cleanup -
- Clear Upper Portion of Backsplash Curtain allows workers to remain visible from the outside
- Sidewall drains allow effluent to be gravity fed down to waste tanks
- 28" Spillguard width allows for easy deployment on standard catwalks
- 11' length accommodates majority of 9' and 10' standard Fin Fan Banks

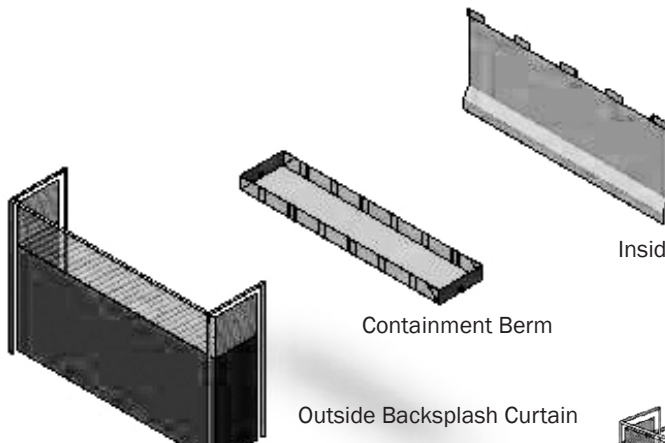

### Specs:

- Containment Berm: 28"x 11' x 8"
- Inside Magnetic Curtain 5' x 11' Hangs Below Fin Fan Header
- Outside Safety Clear 7' x 15' Backsplash Curtain
- 3" Camlock Drains to transfer collected hydroblast fluids

### Accessories:

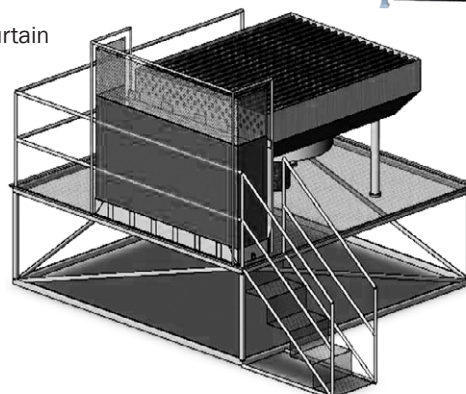

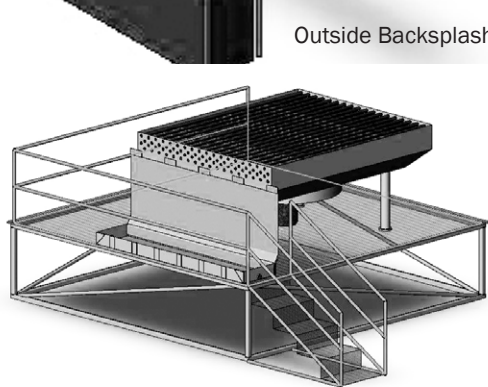

- Modular Hose Spillguards to contain effluent vacuum hoses
- Puncture resistant track belts
- Puncture resistant ground mats
- SolidGround® Traction Mats
- Create a reusable blast water system by combining the SprayGuard with Rain for Rent pumps, filtration and tanks. Closed-loop filtration systems available.
