

# Construction at Oregon Landfill Requires Wheel Wash to Prevent Track-Out

## PROJECT SCOPE

Prevent track-out at landfill during construction

## CLIENT

Landfill

## INDUSTRY SEGMENT

Construction

## EQUIPMENT

- Wheel Wash

## BACKGROUND

A landfill in Oregon was undergoing new construction to expand their facilities and needed a temporary wheel wash system to prevent track-out during construction.

## OUTCOME

Rain for Rent provided a two-wheel system to wash tires as trucks exited the landfill to prevent track-out on local roadways.

## HIGHLIGHTS

- Rain for Rent assisted with the installation of the system.
- The project is expected to extend six months.
- A permanent system will be installed once construction is finished.

## CUSTOMER FEEDBACK

The customer is pleased with the responsiveness of the Rain for Rent team.
